

The whole game in one breath: in **Chapter One** you shop for tiles and stack them on your ship. In **Chapter Two** you unload them, **one per turn**, to build a planet. Most points wins.

1 WHERE YOU'RE HEADED a finished settlement area, right of your ship

C **City rows.** Up to 5 cities, one per letter A-E. A city sign on the left, then land and buildings. **Biggest city of each letter scores big at the end.**

D **Defense row.** Flipped shuttles and satellites showing shields. **Most shields scores big at the end.**

S **Shuttles row.** Shuttles you used as taxis to carry builders down.

P **Satellites row.** Satellites you cashed in for points.

Points also come from: grabbing robots early, unused cards, **population ships** (race goals on the board), and gold-winged builders.

2 THE CATCH: LAST IN, FIRST OUT this is the whole strategy

Chapter One · Colossus Station · 5 rounds

Every tile you win docks onto one of the 5 rows to the **left** of your ship, added at the **far end**. Rows grow longer and longer.

LOAD →

Chapter Two · Settlement

You can only take the tile at the **far end** of a row, which is the last one you put there. Load in the order you'll want to unload.

← UNLOAD

3 MEET THE PIECES 100 square tiles in the bag · front = module, back = planet

Terrabot

×25

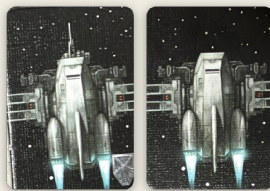

letter A-E

Looks like: a robot with a lettered circle.

Job: starts a city of its letter, or makes it longer. **Scores the moment you grab it** in Chapter One.

Shuttle

×20

shield icon

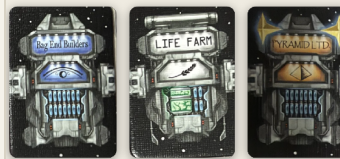

no icon = 0

Looks like: a white rocket, no letter, no name.

Job: either a **shield** for your defense row, or a **taxi** that carries up to 2 builders down.

Builder unit

×39

company

farm

gold wings

Looks like: a boxy building with a company name.

Job: grows a city. **Can't fly alone**, so it needs a shuttle. Gold wings = bonus points.

Satellite

×16

task X : N

Looks like: a gold pod with a little task at the top.

Job: either **cash in its task** for points right away, or flip it for 1-2 shields.

Officer cards

Numbered 1-5, six of each. Spend them to win tiles. The number picks the docking row.

Your carrier

Nose away from you. **Left** = docking area. **Right** = settlement area.

City signs

One per city, by letter A-E. Goes at the left of a city row.

Population ships

Race goals. First to meet one takes it for its points.

Final ship

End-of-game scoring: shields and biggest city per letter.

EVERY ROUND STARTS WITH

- 1 Fill all 20 **ports** on the station from the bag: top row left to right, then the bottom row.
- 2 Shuffle all 30 officer cards and deal a **fresh hand: 13 each** with 2 players, 9 with 3, 7 with 4. Extras go face down as the discard pile.

YOUR TURN: DO ONE then clockwise

- A Grab a tile.** Play card(s) face up into its slot. The **top card's number = which docking row (1-5)** it goes on, added at the far end.
- B Take the starting player marker.** Play any 1 card face down on its space. **+1 point.**
- C Drop out.** Can't or won't play? **+1 point per card left**, discard them, and sit out the rest of the round.

HOW MANY CARDS TO GRAB A TILE

THE 2 SLOTS NEXT TO IT

YOU MUST PLAY

□ □ both empty

any 1 card

■ □ one has cards

1 card **matching its top number**, or any 2

■ ■ both, same number

1 matching card, or any 2

■ ■ both, different

2 cards (one matches each), **or** 3 cards (at least 1 matches), **or** any 4

Playing more than one card? You choose which goes on top, and that picks the row. The starting player space doesn't count as a slot.

ROBOT BONUS & ROUND END

Grab a terrabot and score at once, by the number on the round track: **4 · 4 · 3 · 2 · 2** (rounds 1 to 5).

Round ends when everyone has dropped out. **Unclaimed tiles go back in the box**, all cards go back to the deck, and the round marker moves right. After round 5, start Chapter Two.

STRATEGY IN 5 LINES

- 1 **Plan the unload while you load.** A city's terrabot must come off before its builders.
- 2 **Park a builder at the far end of a row with a shuttle right behind it.** One turn moves both.
- 3 **Grab robots early.** They're worth 4 in rounds 1-2 and only 2 at the end.
- 4 **Don't leave a contest empty.** No city of a letter, or no shields, costs 3 points each.
- 5 **Race the population ships.** Emptying a docking row first is an easy 5.

YOUR TURN starting player first, then clockwise

- 1 **Undock exactly 1 tile** from the far end of any docking row, and use it right away (below).
- 2 **Check the population ships.** First to meet a ship's goal takes it, scores it, and parks it on their carrier.

Ship empty? You skip your turns. Every ship empty → the game ends.

WHAT EACH TILE DOES

TERRABOT

Flip it. **First of its letter:** start a new city row with that letter's city sign on the left. **Already have that letter:** add it to the end of that row. One city per letter.

SHUTTLE

Pick one:

- **Shield:** flip it into your defense row. A 0-shield shuttle can't do this.
- **Taxi:** pick up to 2 builders from the far end of **any** of your rows, place them in any order, then put the shuttle face up in your shuttles row.

BUILDER

Only arrives by taxi. Flip it onto the end of a city row:

- **Life Farm:** any city.
- **Company you already have:** must join that same city.
- **New company:** any city with no company yet. Nowhere legal? Back in the box.
- **Gold wings:** +1 point per tile in that row, including the sign.

SATELLITE

Pick one:

- **Cash in:** score its task now, then place it face up in your satellites row.
- **Shield:** flip it into your defense row (1-2 shields).

Stuck builder? Instead of a normal undock, you may toss 1 builder from a row's end back in the box. **Builder in front of a shuttle?** You can take the shuttle with that builder already on board.

GAME END

When every ship is empty, take the **final population ship** and score its 6 contests (page 3). Most points wins.

FIRST GAME SETUP one time only

- 1 Board in the middle. Final population ship on its space, **2/3 side** up (4 players: "4" side).
- 2 14 population ships on their spaces, any order. Check each tail and flip to your player count.
- 3 Each player: a carrier, nose pointing away. Score marker on **0**.
- 4 All 100 tiles in the bag. City signs sorted into 5 piles by letter. Round marker on the leftmost space.
- 5 Pick a starting player; they put the starting player marker on their carrier.

SCORING

Every way to score
keep this page face up on the table

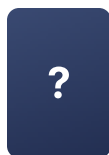

1 DURING CHAPTER ONE score these the moment they happen

Grab a terrabot

4 4 3 2 2

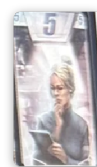

points in rounds 1 · 2 · 3 · 4 · 5
(shown on the round track)

Take the start marker

+1

play 1 card face down on its space

Drop out of a round

+1 per card

left in your hand when you drop out,
every round

2 SATELLITES: CASH IN A TASK

The task is printed at the top of the tile: **symbol : points**. Match it below. Score it when you undock the satellite, then lay it face up in your satellites row. **It counts what's on your planet right now**, so cash in late.

SYMBOL ON THE
TILE

YOU SCORE

A-E : 2

2 per terrabot showing that letter

Company : 3

3 per builder from the company pictured

≠ : 2

2 per different company you have (Life Farm counts)

Ring : 1

1 per terrabot, any letter

Shield : 1

1 per shield in your defense row

Builder : 1

1 per builder, any company

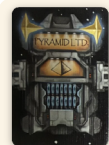

Ring × builder

pick 1 city: its terrabots × its builders

City row

pick 1 city: 1 per tile, sign included

Gold-wing builders (one per company): when it lands,
score **1 per tile in that city**, sign and itself included.

3 POPULATION SHIPS race goals on the board

Check at the **end of each of your Chapter Two turns**. First to meet a goal takes the ship and its points. Nobody else can win it. Unclaimed ships score nothing.

6

2

Biggest E city

8

4

10

6

2

2 players 1st place only. Second place gets nothing.

3 players 1st and 2nd score. **4 players** 1st, 2nd and 3rd.

-3 for **each** contest where you have **no tile at all**: no shields, or no city of that letter.

Ties Add up the places the tied players cover, split evenly, round down. Example, 3 players: two tie for biggest A city → 14 + 6 = 20 → **10 each**.

Winner Most points. Tied? Most population ships on your carrier. Still tied? Share the win.
